RECEIVED & FILED
2023 APR 12 PM 3:01
CLERK OF THE COURTS
NORFOLK COUNTY

**AFFIDAVIT OF RICHARD GREEN IN SUPPORT OF DEFENDANT’S MOTION FOR ORDER
PURSUANT TO MASS. R. CRIM. P. 17 DIRECTED TO BRIAN ALBERT, VERIZON, AND
AT&T**

I, Richard Green, under oath, do depose and state as follows:

1. I am a data forensics expert with United States Forensics, LLC (hereinafter, “USF”). I am a Certified Computer Examiner with the International Association of Computer Forensic Examiners and hold certifications in Cybersecurity, Computer Crime Investigations, and Digital Forensics and Computer Investigations, A.S.

2. The following facts and information are based on my own personal knowledge, and I could testify competently thereto if called upon as an expert witness to do so. I declare that the following is true and correct to the best of my knowledge and that I have no personal interest in the outcome of this case.

3. USF has received, *inter alia*, Cell Phone Data Images of two iPhone devices, which were forensically imaged by the Massachusetts State Police in connection with this case. They have been entered into evidence as follows (USF Evidence number followed by description, owner, and serial number):

- 22-398304, iPhone11 JMcCabe, Jennifer McCabe, G0NCX5RRN72W
- 22-398310, iPhone11 O’Keefe, John O’Keefe, F4GFRBEQN72Q

4. The Data Images have been processed and reviewed with Cellebrite Physical Analyzer V7.61.0.12 and Axiom Forensics V6.11. Additional forensic tools utilized include BelkasoftX, Sanderson

SQLite Forensic Explorer, and Cellhawk by Hawk Analytics. All times listed have been converted to Canton, MA local time (UTC-5) unless otherwise noted.

ANALYSIS OF JENNIFER MCCABE'S IPHONE 11

5. I have analyzed the data obtained from the forensic image of Jennifer McCabe's iPhone 11 (Serial No. G0NCX5RRN72W / USF Evidence No. 22-398304) using the tools outlined in Paragraph 4 above. That analysis has revealed significant exculpatory evidence.

Search History

6. In my professional experience, an analysis of the device's internet search history often gives valuable clues as to the user's intent or knowledge surrounding an incident. I conducted a review of the search history information obtained from Jennifer McCabe's iPhone 11, and observed the following significant artifact from the morning in question:

- **Search Term**: hos long to die in cold
- **Date/Time**: 1/29/2022 2:27:40 AM
- **URL**: <https://www.google.com/search?q=hos+long+to+die+in+cold&ie=UTF-8&oe=UTF-8&hl=en-us&client=safari>
- **Source**: Safari Suspended State Tab
- **State**: Deleted (as reported by Cellebrite)

*Thus, search history information obtained from Jennifer McCabe's cell phone indicates that on January 29, 2022, at 2:27:40 a.m., the phone's user entered the following search in Safari: "hos long to die in cold." A true and correct copy of the Cellebrite information associated with this artifact is attached hereto as "**USF-01**."*

7. In order to confirm the accuracy of this search event as reported in Cellebrite, I independently performed a low-level analysis of the artifact found in "**USF-01**", which was located in the BrowserState.db-wal ("Write Ahead File"). Write Ahead Files are temporary in nature, and show the location where data is written before commitments to the main database are made. The particulars of this artifact are as follows:

- **Location**: \private\var\mobile\Library\Safari\BrowserState.db-wal
- **Database Record ID**: 4028
- **Raw time data**: 665134060.465336
- **Time Converted to UTC**: Saturday, January 29, 2022 07:27:40 AM (UTC-0)

- Adjusted to Local time: January 29, 2022 02:27:40 AM (UTC-5).

Thus, I was able to independently verify that the time, date, and fact of the search reported in Cellebrite was accurate.

8. *Significantly, the Cellebrite analysis further reveals that the 2:27:40 a.m. search for “hos long to die in cold” was thereafter deleted by the user.* The BrowerState.db dataset contains information about the Open Tabs in the safari application. This allows a user to leave the application and then return at a later time to resume the browser session. The individual tabs can be deleted by the user. Here, Cellebrite indicates that the 2:27:40 a.m. search for “hos long to die in cold” was deleted by the user.

9. I also performed a timeline validation of the 2:27:40 a.m. search, by confirming that the device was in use at the time of the search. The following artifacts support that user was interacting with the phone during this period.

- The iPhone was unlocked between 2:23:31 AM and 2:31:07 AM
- Text Messages were sent at 2:25:11 AM and 2:25:56 AM
- Two screenshots were deleted at 2:26:37 AM
- The search for “hos long to die in cold” was entered at 2:27:40 a.m.

Thus, the data unequivocally establishes that an individual using Jennifer McCabe’s iPhone 11 searched “hos long to die in cold” at 2:27:40 a.m. on January 29, 2022.

10. A further review of searched artifacts revealed that the user of Jennifer McCabe’s iPhone 11 conducted several similar searches later that morning on January 29, 2022. A true and correct copy of these subsequent searches are attached hereto as **“USF-02,”** and include the following:

- 1/29/2022 06:23:51 AM - how long ti die in cikd
- 1/29/2022 06:24:18 AM - hos long to die in cold

11. I was also able to locate an additional artifact, attached hereto as **“USF-03,”** which was recovered from the Safari Cache Records and indicates that the user also conducted the following search:

- 1/29/2022 06:23:49 AM - how long does it take to digest food.
- Found in: https://cdn2.smoot.apple.com/image?.sig=tnfvltCqZD6Q_s_EQNpFag%3D%3D&domain=web_index&image_url=https%3A%2F%2Fpost.healthline.com%2Fwp-content%2Fuploads%2F2020%2F02%2F732x549_THUMBNAIL_How_long_does_it_take_to_digest_food.jpg&spec=120-180-NC-0

Deleted Call Logs

12. I also conducted a forensic analysis of the users' call log history from the date in question. An analysis of a device's call history is helpful in determining associates of the user, which may be of interest. A user's call history is automatically recorded and stored on a user's cell phone. The absence of recent historical call information suggests that a user has taken affirmative steps to delete the call history. In my professional opinion, the confirmed deletion of recent historical call information suggests that a user has engaged in efforts to tamper with, alter, destroy, and/or hide information or evidence. Importantly, deleted information is not always recoverable. The Call Log artifacts were examined using Cellebrite's Physical Analyzer and are attached hereto as "USF-04". Further analysis was performed with Axiom Forensics, both of which suggest that there were significant deletions of call data by the user of Jennifer McCabe's iPhone 11:

- 10/24/2020 to 1/27/2022 - Only Facetime Call Data is recorded (Parsed by Axiom).
- 01/28/2022 – No Call Log data found in CallHistory.storedata.db (main storage location) but indications of calls found in KnowledgeC database (records various user activity)
- 01/29/2022 - 18 Deleted Call Entries between 5:33:47 AM and 8:50:15 AM
- 01/29/2022 - The 6:03:47 AM 911 Call is deleted. (Included in the 18 above).
- 01/29/2022 - The 6:07:42 AM and 6:08:17 AM calls to "Coco" aka Nicole Albert are deleted (Included in the 18 above)
- 01/29/2022 - The 6:23:00 AM call to "uncle brian a" is deleted (Included in the 18 above)
- 01/29/2022 8:59:34 a.m. to 2/2/2022 - Normal Call Log Activity found.

13. In this case I was able to further verify that there were additional deletions which were not recovered from Jennifer McCabe's iPhone 11 using Cellebrite, by cross-referencing the deleted call entries from Jennifer McCabe's cell phone with data obtained from John O'Keefe's and Karen Read's cell phones.

- 01/29/2022 - There are 17 calls listed on John O'Keefe iPhone referencing Jennifer McCabe's cell phone number (7818580142) on 1/29/2022 attached hereto as "USF-05". Only one of these calls is found in the JMcCabe iPhone CallHistory.storedata.db and that particular artifact is listed as deleted (highlighted in Green on "USF-04").
- 01/29/2022 - There are eight calls listed on Karen Read's iPhone call log referencing Jennifer McCabe cell phone number (7818580142) on 1/29/2022 attached hereto as "USF-

06". Of these eight calls, only two are found in the JMcCabe iPhone CallHistory.storedata.db (highlighted in Yellow on "USF-04").

Thus, I was able to determine that certain call log history and data was missing from Jennifer McCabe's iPhone, which could not be recovered using Cellebrite. In order to obtain a complete accounting of the calls that could not be recovered using Cellebrite, I will need to obtain call detail records from Jennifer McCabe's cell phone carrier and cross-reference that information with the data obtained from the analysis of her cell phone. This analysis may lead to the discovery of additional devices that should be preserved and analyzed. Acquisition and preservation should include potential backup sources such as computers and cloud storage platforms as well as synced devices such as tablets.

Deleted Screen Shot

14. In addition to the above data that was deleted from Jennifer McCabe's iPhone, a screenshot of a contact saved as "uncle brian a" described as "home #3" with the associated phone number (617) 777-0888, was found to have been created on 1/29/2022 @ 6:08:35 AM, and was deleted later that day at 12:53:23 PM. A true and correct copy of that artifact is attached hereto as "USF-07." It is noted that Jennifer McCabe's brother-in-law is Brian Albert, whose cell phone number has been confirmed as (617) 777-0888.

Location Data

15. An analysis of a device's location data is helpful to determine the user's whereabouts during specific incidents. iPhones store various location data with varying degrees of accuracy. When an application request's location data, the iOS responds with what is known as Apple Location Services and Assisted GPS. Some applications may require only regional data (such as weather applications) and other ones highly accurate data (such as driving applications, as in Waze).

16. In an effort to determine the whereabouts of Jennifer McCabe's iPhone on January 29, 2022, location data was exported into the Cellhawk application. This program allows the expert to filter location data based on accuracy, time, and location. For this portion of the analysis, I only relied on data that had an accuracy of 100M or better. The following is a summary of location events for 1/29/2022. The timing of Jennifer McCabe's search for "hos long to die in cold" has been added for reference.

- 12:00:00 AM In Proximity to the Waterfall Bar & Grill.
- 12:13:46 AM Accuracy improves significantly and indicates leaving Waterfall.
- 12:18:25 AM Arrives at the Alberts residence @ 34 Fairview.
- 01:47:17 AM Accuracy improves significantly and indicates leaving Fairview.

- 02:03:13 AM Makes a right turn onto Lawrence St, this is the turn before Pleasant Street, which intersects with John O’Keefe’s residence.
- 02:04:25 AM Located on Leonard Way, course is reversed.
- 02:12:38 AM Arrives at Jen McCabe residence @ 12 Country Lane.
- **02:27:40 AM At 12 Country Lane, search “hos long to die in cold”.**
- 05:39:10 AM Leaves 12 County Lane.
- 05:46:05 AM Arrive at John O’Keefe Residence @ 1 Meadows Ave.
- 05:52:45 AM Leaves 1 Meadows Ave.
- 05:57:10 AM In Proximity to the Waterfall Bar & Grill.
- 06:03:05 AM Arrives at The Alberts Residence @ 34 Fairview.
- 11:16:03 AM Leaves 34 Fairview.
- 11:22:55 AM Arrives at Jen McCabe Residence @ 12 Country Lane.

Health Data Information

17. Data obtained from the Health application on Jennifer McCabe’s iPhone indicates that her device was connected to an Apple Watch on January 29, 2022, which enhances the accuracy of the health data recorded and provides for a greater amount of detail. A true and correct copy of data obtained from the Health application on Jennifer McCabe’s iPhone, which was recorded on January 29, 2022, is attached hereto as **“USF-08.”**

ANALYSIS OF JOHN O’KEEFE’S IPHONE

18. I have also analyzed the health-related data obtained from USF Evidence No. 22-989310, which is a forensic image of John O’Keefe’s iPhone 11. When a user enables the application to record information, the iPhone’s operating system can record a broad range of activity and health-related data. The following information was obtained from O’Keefe’s Health application between 12:00:00 a.m. and 6:00:00 a.m. on January 29, 2022.

- 12:11:09 AM to 12:21:05 AM - 170 Steps, 99.6 Meters (326.77 Ft)
- 12:21:10 AM to 12:24:22 AM - 80 Steps, 87.74 Meters (287.86 Ft)
- 12:21:14 AM to 12:24:37 AM – Ascended / descended three floors
- 12:31:56 AM to 12:32:16 AM - 36 Steps, 25.46 Meters (83.53 Ft)

Notably, although the time ranges indicated above record total steps and/or elevation during the relevant time period, it is impossible to determine whether the steps taken and/or elevation gain was recorded during the entirety of that time period or for only a portion thereof. A true and correct copy of the analysis of O’Keefe’s Health data recovered using Axiom is attached hereto as “USF-09.”

19. I subsequently analyzed the location data associated with O’Keefe’s iPhone. iPhones store various location data with varying degrees of accuracy, as explained in paragraph 12 above. In order to analyze the location data associated with this case, the location data was exported into the Cellhawk application. This application allows the expert to filter based on accuracy, time, and location. For this portion of the analysis, I only relied on data that had an accuracy of 100M or better. Based on my analysis of the location data obtained on O’Keefe’s cell phone, it appears that the first location ping in the neighborhood near the Albert Residence occurred at 12:19:33 a.m. Location data indicates that O’Keefe arrived at the Albert Residence at 34 Fairview at 12:24:28 a.m.

CONCLUSION

20. In order to properly investigate O’Keefe’s death and recover critical information surrounding what transpired on January 29, 2022, and the days thereafter, I will need to obtain substantive text and/or iMessage communications, search history, web browsing history, location data, and/or cell phone data that may have been deleted during the relevant time period by the individuals in question. I can only obtain this information by creating a proper forensic image or extraction of the cell phones themselves (or any potential backup sources such as computers and/or cloud-storage platforms as well as synced devices such as tablets). Once I have created a forensic image of the device(s) and/or data, I can run various tools and conduct a forensic analysis of the information to obtain the critical information outlined above.

21. Furthermore, cell phone carriers independently maintain call detail records, including call records, SMS text and MMS records, and data usage records, cell tower and cell phone location information, and subscriber information associated with their customers. Thus, cell phone carrier records are necessary to independently establish whether any substantive communications may have been missing, deleted, or are otherwise unrecoverable using forensic tools to analyze the devices themselves. Whereas here, there is significant evidence that persons connected with this case have made attempts to delete, destroy, alter, and/or tamper with information or evidence that was turned over to law enforcement, it is absolutely necessary that I be able to compare any data uncovered through a forensic analysis of the individuals’ devices with their corresponding cell phone carrier records (which are independently

maintained) in order to ensure that all relevant data is uncovered and there is not information that my tools may have been unable to locate and/or recover.

SIGNED and SWORN to under the pains and penalties of perjury this 11th day of April 2023.

Richard Green
